EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert Lambrechts on 6/21/05.

The application has been amended as follows:

the previous claim listing should be replaced with the following:

1. (Previously Presented) An apparatus for adjusting the dimensions of extruded thermoplastic component, said apparatus comprising:

a member mounted on a fixture, the member configured for receiving the thermoplastic component exiting the fixture wherein the member is further comprised of an outer member with a first and second leg, and an inner member, the inner and outer members including an upper surface and a shaping means opposed the upper surface for adjusting the dimensions of the component exiting the fixture, the shaping means comprising a finger outwardly extending from the inner and outer members wherein the finger of the inner and outer members includes an elliptical crown for contact with the thermoplastic component, the inner member being slidably disposed between the first leg and second leg of the outer member;

Art Unit: 1722

means for selectively modifying the configuration of the member from a first position to a second position so that as the thermoplastic component is received by the member a dimension of the thermoplastic component is modified.

2.-3. (cancelled)

4. (Currently Amended) The apparatus according to claim 2 1, wherein the inner member includes an overhanging plate detachably secured to an upper surface of the inner member.

5. (cancelled)

6. (Original) The apparatus according to claim 4, wherein the means for selectively modifying the configuration of the member comprises a screw in threaded engagement with the overhanging plate and in proximate contact with a substantially horizontal surface of either outer member so that upon rotation of the screw the inner member is slidably urged from the first position to the second position.

7.-8. (cancelled)

9. (Original) The apparatus according to claim 1, wherein the member is attached to the fixture with dowel pins.

10-18 (cancelled)
